Whop API Permissions Issue

Current Problem

The API key doesn't have permission to access `list_memberships` endpoint.

What You Enabled

- ✅ `member:basic:read`
- ✅ `member:email:read`

What You Might Need Instead

Based on Whop's API, you likely need **one of these permissions**:

Option 1: Memberships Permission

Look for permissions named:
- `memberships:read`
- `list_memberships`
- `company:memberships:read`
- `read:memberships`

Option 2: Company Scope

Look for permissions related to your company/business:
- `company:read`
- `business:read`
- Any permission with "company" in the name

Where to Check

1. Go to: https://dash.whop.com/settings/developer
2. Find your **CatchBarrels** app
3. Click **"Permissions"** tab
4. Look for **ANY permission** that contains:
   - "membership" (not just "member")
   - "company"
   - "business"
   - "list"

Screenshot Needed

Please take a screenshot showing **ALL available permissions** in the dropdown - not just the ones you see at the top. Scroll down to see if there are more options related to:
- Memberships (plural)
- Company data
- Business data
